Fedoskino miniature

Fedoskino miniature is a folk handicraft that emerged in the settlement of Fedoskino near Moscow in the late 18th century. Fedoskino miniature is a unique art renowned for its highly detailed and exquisite work. In the early 19th century, master painters began to create miniature pictures on lacquered surfaces. They used them to adorn caskets, smoking accessories, and a range of household objects. With time, Fedoskino handicraft gained popularity not only in Russia but also abroad. One of its clearly distinctive features is using a lacquer painting technique that translates into exquisite images. A variety of colors and shades are used to create true-to-life pictures. Still another distinctive feature is that the miniatures can be painted on different surfaces, like, lacquer, bone, or metal. Every artist boasts a style and technique of their own, which makes it possible to tell their work from that by any other painter. Today, among the Fedoskino products you can find not only traditional items, such as caskets and tobacco boxes, but also adornments and even big pictures.

Gzhel

This type of decorative painting is one of the best known and most popular varieties of Russian folk production. It originated in the late 18th century, after several ceramic workshops scattered over a vast territory of 27 villages united to set up what came to be known as 'Gzhel Branch' some 60 km from Moscow. Initially masters produced a limited number of ceramic articles, but gradually they began to attract the attention of customers from Moscow and other cities. The demand for ceramic products with highly original painting grew rapidly, and potters began to produce clay pots, pitchers, kettles, plates, and other tableware in large quantities. The traditional technology of manufacturing Gzhel ceramics consists of several steps. First, clay is kneaded with sand and water. Then it is given the required shape on the potter's wheel. After that the product is dried and then fired in a kiln at a temperature of over 1,000° Celsius. After the firing, the object is covered with white glaze, over which an artist applies vivid blue designs, which make Gzhel products so familiar to everyone. At present, Gzhel ceramics are more than just attractive and functional products - they have become a true symbol of Russian culture and history. As ever, they fascinate people by their beauty and highly original style, and, thus, enjoy popularity both in Russia and abroad.

格热利陶器

这种类型的绘画是俄罗斯民间工艺中最著名和最受欢迎的一种。它出现在18世纪末，由27个村庄中大的几个陶瓷作坊联合起来的结果。这些村庄的联合体坐落在距离莫斯科60公里的《格热利联盟社》。初期，工匠们制作的陶瓷数量有限，但逐渐吸引了来自莫斯科和其他城市买家的注意。具有独创的彩色花纹的陶瓷产品的需求迅速增长，工匠们开始大规模生产粘土罐、水壶、水壺、茶壺、盘子和其物品。格热利陶瓷的传统生产工艺包括几个阶段。首先，用沙子和水对粘土进行揉捏，然后在陶轮上对产品进行塑形。之后产品被烘干并在超过1000度以上的窑中烧制。烧成后，它被涂上白色的釉，上面有大家熟悉的蓝色花纹。今天格热利陶瓷不仅是美丽实用的商品，而且是俄罗斯文化和历史的真正的标志。它们的美丽和原创性令人着迷，因此不仅在俄罗斯，而且在外国也很受欢迎。

Gusev Crystal

Gusev crystal is a handicraft that has existed for more than two hundred years. It originated in the town of Gus Khrustalny in the Vladimir region in the 17th century, when local craftsmen began to produce glass. At first, they used only glass to create objects decorated with various designs. Gradually, they began to add lead oxides to glass to make it more transparent and lustrous. As a result, even more beautiful and exquisite glass appeared and came to be known as crystal. The manufacture of Gusev crystalware goes through a complicated step-to-step process, requiring high mastery. First, glass is heated to a high temperature, and then cooled. After that the glassmaker begins working with the ready product using various tools to achieve the required shape and enrich the glass with specific decor. As a final step, the product is ground and polished to make its surface smooth and glossy. Gusev crystal goes into the making of a wide range of adornments and interior accessories, among them vases, wine glasses, plates, candleholders, and pitchers. These crystalware items will do honor to any home, and can serve as lovely gifts for close relatives and friends.

古谢夫水晶

古谢夫水晶是一种已经存在了二百多年的工艺。它起源于17世纪弗拉基米尔地区的古西（Гусь）水晶镇，当时那里的玻璃生产已经建立。玻璃制造商开始生产有各种图案和设计的装饰物品。渐渐地，工匠们开始在玻璃中添加铅氧化物，使其更加透明和有光泽。这使得制造更多美丽和精致的产品成为可能，这些产品被称为“水晶”。古谢夫水晶的制作过程非常复杂，需要极高的技术。玻璃首先被加热到高温，然后冷却，之后工匠开始在成品玻璃上加工，使用各种工具来创造作品的形状和上面的图案。最后阶段是对作品进行打磨和抛光，使其具有光滑和闪亮的表面。古谢夫水晶被用来制作各种装饰品和室内用品--花瓶、玻璃杯、盘子、烛台、水壶等等。这些产品可以装饰任何房屋，成为送给亲戚和朋友的美好礼物。

Khokhloma

Khokhloma, a Russian folk craft of decoratively painted woodenware, boasts a long history. Today it enjoys international recognition, and is regarded as a national treasure of Russia. The handicraft appeared in the 17th century in the settlement of Khokhloma on the Uzol River. At first, decorative patterns were painted only on wooden tableware, but later they were used to adorn walls, furniture, and other objects of home interiors. The Khokhloma painting technique is based on observing its strict compositional principles, colour harmony, and thin line. Painting is done by hand using a brush and acrylic paints. A painter makes a drawing, then draws a thin line around it, and then fills it with multicoloured designs. Every element of the design looks like a separate fragment, but together they make up a single whole. Khokhloma patterns often feature floral motifs, primarily flowers, branches, and leaves. They also use elements of folk costume, animals, and birds. Khokhloma painting is used to decorate a variety of interior accessories, like tableware items, boxes, and toys. Thanks to it, we can have one-of-a-kind works that do honour to our homes. If you are still unfamiliar with Khokhloma painting, do find some its images. You will surely be fascinated with the beauty of this Russian folk handicraft.

Kaslinsky Cast Iron Plant

The culture and traditions of different peoples have always been admired for their beauty and unique character. A vivid proof of this is Kaslinsky iron casting, a craft that emerged in Russia in the 18th century. Handed down from generation to generation, this unique art continues to delight people with its beauty. The Kaslinsky casting traditions originated in 1747, the year when a merchant from Tula, Yakov Korobkov, acquired 250,000 desyatins (land measure equivalent to 2,7 acres) of land in the Southern Urals, and founded a metallurgic and cast-iron plant. Later, thanks to the efforts of the plant's other owners, the Druzhinin family, Kaslinsky artistic casting became highly popular and acquired recognition not only in Russia but also beyond its borders. The high artistic value of cast-iron works, top quality casting, virtuoso mechanical finish, and paints that give a deep black color with an even satin gloss - all unite to turn each and every casting into a true masterpiece, while the wide range of products executed in a variety of styles and themes raises Kaslinsky casting to a height inaccessible to competitors. Kaslinsky casting is a unique art worthy of admiration. By today, the folk trade has developed into a major industrial manufacturer of a great variety of metalware products.

卡斯利诺铸件

各民族的文化传统总是让人惊叹于它们的美丽和独特。这其中之一就是卡斯利诺铸件---一种18世纪起源于俄罗斯的民间手工艺品。这种独特的艺术代代相传，至今仍以其美感而取悦着人们。卡斯利诺铸件的传统起源于1747年，当时来自图拉的商人雅科夫·科罗布科夫在乌拉尔南部获得了25万俄顷的土地，并建立了卡斯利诺铁厂和铸铁熔炼厂。后来，由于厂主G.V.和V.G.德鲁日尼内赫的努力，卡斯利诺艺术铸件变得非常流行，不仅在俄罗斯，而且国外也获得了认可。高度艺术化的模型，优秀的铸造质量，精湛的加工和喷漆，使深黑的颜色带有光滑的缎面光泽--所有这些特点使每一个铸铁件成为真正的杰作，而以多种风格和多种主题已完成的大量的产品，使卡斯利诺的铸件达到了竞争对手无法达到的高度。卡斯利诺铸件是一种独特的艺术，值得钦佩。今天，卡斯利诺的铸件已经从民间工艺发展成为一个生产各种金属产品的产业集群。

STOLESHNIKOV • 斯托雷尼科夫

THE SECOND MOST EXPENSIVE ...

Stolesnikov street runs between Tverskaya Square and Petrovka street. In the 17th century, a settlement of weavers, called Stoleshniki, lived there. The small street was then popular among aristocrats and rich high-ranking clerks. The street originally comprised wooden houses, but after the great fire of 1812 one- to two-storey stone buildings were built.

At the end of the 19th century, many drapers and mercers opened shops here. At this time, five- to six-storey buildings, housing well-furnished apartments, were built.

By the middle of the twentieth century Stoleshnikov street was famous for a shop selling confectionary and for book shops. There were also plenty of antique shops. Now, the ground floor of many buildings on the street are luxury boutiques for world-famous brands. Stoleshnikov Street is the most expensive street not only in Moscow but in the whole world - with only one exception! According to research by Jones Lang LaSalle in 2007, it is second only to the Champs Elysees.

The closest metro stations to this famous street are: Tverskaya, Pushkinskaya, Okhotny Road, Teatrnaya and Kuznetsky Most, which are about 500 metres away.

斯托雷尼科夫小巷

斯托雷尼科夫小巷 (Stolesnikov lane) 从特维尔广场 (Tverskaya square) 延伸到彼得罗夫卡街道。17世纪这是织布工市郊“斯托雷尼科” (Stoleshniki)。18世纪莫斯科的贵族和富裕的官员也喜欢这个位于莫斯科中心的小巷。一开始这个小巷上的房子都是用木头做的，1812年的大火后，政府在那里建筑了一两层的石头房子。

以前俄罗斯著名的作家吉利亚洛夫斯基长时间住在斯托雷尼科夫小巷，并赞赏小巷的美丽：“斯托雷尼科夫小巷反映了整个城市的生活，仿佛太阳光映在水中”。在19世纪和20世纪的交汇时刻，小巷里建了很多商店和商铺，主要出售织物和小百货。同时，在斯托雷尼科夫小巷建了新的设备齐全房子，有五六层高。

小巷不仅是莫斯科最昂贵的街道，而且是全世界唯一的例外。

20世纪中期斯托雷尼科夫小巷以它的糖果点心店和书店而著名。这里的古旧书店提供更广泛更优质的产品。当前著名品牌的专卖店位于斯托雷尼科夫小巷的房子第一层。小巷作为莫斯科而全世界的最贵的商业街道之一。根据2007年Jones Lang LaSalle公司进行的研究，位于斯托雷尼科夫小巷商店的物价仅次于香榭丽大道上的商店。

离小巷最近的地铁站大概五百米。特维尔地铁站、普希金站、猎人商行站、剧院站、库兹涅茨克桥站都在斯托雷尼科夫小巷附近。

Twins Garden: Moscow’s most renowned restaurant boasting two Michelin stars sits at the very heart of the capital and offers a panoramic view of Moscow downtown. A large roof terrace is open in summer. The transparent walls and sliding ceiling lighten up the space. An abundance of hydrangeas adds to the feeling of comfort and summer mood. Twins Garden offers a set menu only. Chef Vitaly Saveliyev provides 4 sets: lunch, dinner, the core set called *Golden Ring Tour*, where each dish pays homage to one of the cities on the country’s most popular tourist route, plus a novelty, *Twins Easy*.

The restaurant recommends wine pairings for each set, including non-alcoholic choices. Since 2017, the restaurant has been wowing its guests with its style, cuisine, service and flavours. Its novel advanced solutions and flavour combinations have ushered a new era on Moscow’s restaurant scene. The restaurant has blazed a trail in hi-tech cuisine, set menuing and unparalleled wine listing, with 1500 items featured from Russia and abroad. Every day Twins Garden’s team reinforces its status as the nation’s best restaurant and invites guests to judge this claim for themselves.

Wine&Crab is one of the most popular restaurants with seafood delicacies with a visit recommendation from the authoritative Michelin gastronomic guide. Starring a variety of crabs and a wine collection. From the very beginning and to this day crabs are the visiting card of the project – the menu includes Kamchatka crab, spiny crab and opilio crab. The a la carte menu includes an assortment of crab sweets and eclair with crab and champagne cream, scallop with yuzu snow and rapan beef stroganoff. Wine is a

worthy pairing for the dishes – there are more than 1000 wines in the menu, 300 of which are champagne. You can study the labels under the vaults of the wine cellar in the company of a sommelier and you can rack your brain over the choice – it is not for nothing that the restaurant received a two-glass award from Wine Spectator for its wines. During the warm season, there is a terrace on the street, surrounded by blooming hydrangeas – the rhythm and energy of the city is especially felt here.

Kostroma

This city, located on the Volga River, 344 km from Moscow, was founded in the 12th century. Its historical center boasts a well-preserved architectural ensemble in the neoclassical style of the late 18th-19th centuries.

The city's Historical, Architectural, Ethnographic and Landscape Museum and Reserve "Kostromskaya Sloboda" is one of the oldest Russian open-air museums.

The larger part of the museum-reserve is located behind the southern wall of the Ipatiev Monastery, at the confluence of the Volga and Kostroma Rivers. The other exposition area is on the side of the monastery's northern wall.

The exposition justly prides itself on the Cathedral Church of the Blessed Virgin Mary, built in 1552, the oldest monument of the church wooden architecture in all of Central Russia. Legend has it that the church was built by two brothers, carpenters Karp and Papila, who were allegedly eventually buried under the church.

TRANSPORT IN MOSCOW

Tickets
To use the Moscow city transport network (metro, monorail, MTsK or Moscow Central Circle, and MTsD or Moscow Central Diameters), as well as aboveground public transport (buses, electro-buses, trams) you can buy a one-trip ticket or a refillable Troika card (when buying a Troika card, make a deposit of 80 rubles). You can purchase a transport card at special automated machines for selling cards and topping up balances, and also at all metro, monorail, MTsK, or MTsD ticket offices.
The cost of one ride in the Central Zone is 50 rubles, but 56 rubles if you pay by your Troika card. Once a year the fare is adjusted by the carrier. When paying by Troika card, you can use the 90 Minute Tarif, which allows you to make one trip by metro, monorail, MTsK or MTsD, and also an unlimited number of rides on all types of aboveground public transport.

Metro
The Moscow metro network, like all other types of public transport in Moscow, operates from 5:30 a.m. to 1:00 a.m. The first and the last trains arrive at different stations at different times (approximately 3-20 minutes after the metro starts operating). At 1:00 a.m. all metro stations and transfer corridors to other lines close their entrances. The shortest waiting time for the next train during the morning and evening peak hours is 90 seconds, at other times the average waiting time is 2.5 -3 minutes. Each metro line is identified by a specific colour and number. Every station is announced by a voice in Russian. It might be interesting to note that the male voice announces the next station when the train moves towards the city centre or clockwise on the ring line, while the female voice makes announcements when moving from the city centre or counterclockwise on the ring line.

Overground Public Transport (buses, electro-buses, trams)
There are some 11,000 overground public transport stops (for both boarding and deboarding) in Moscow. Many of these are equipped with USB ports to charge mobile devices, and also with electronic displays, which provide real-time information on the arrival of vehicles moving on a specific route. These stops also provide information on the numbers of the routes on which are the buses, electro-buses or trams that stop there. 16 late-night overground transport routes are operated in Moscow with an interval of 15 to 30 minutes. The numbers of late-night routes are designated with the Russian letter "H" which stands for 'nochnoy' (night). There are also two round-the-clock routes: one designated with the Russian letter 'Б' (with vehicles arriving every 15 minutes), and the other with 'm40' (with vehicles arriving every 30 minutes). For detailed information on the routes of the Moscow public transport, visit mosgorzrans.ru To make your trips on Moscow public transport more comfortable, install the application 'Московский транспорт' on your smartphone (available for both iOS and Android). The application will offer you the cheapest and quickest route, calculate the approximate time, transfers on the route, and the cost of your trip. Using the application, you can keep track of vehicles moving on all routes.

MONEY AND SECURITY

Money
The official currency in Russia is the ruble. We recommend that you, if possible, change your currency for rubles in good time at Moscow's banks or their departments, since there are few round-the-clock currency exchange bureaus.

The information on the latest currency exchange rates, and the locations offering the best buying/selling rates is available at www.banki.ru

Security
Moscow is a safe city, with efficiently working police, while street crime is at a low level.
In case of any emergency call 112. You are sure to get the help you need!

莫斯科的交通

车票
乘坐莫斯科公共交通工具（地铁、单轨铁路、МЦК（莫斯科中心环线）、МЦД（莫斯科主要干线）以及地面交通工具（公共汽车、无轨电车、有轨电车），可以购买单程票或可充值的“特罗伊卡”（Тройка）交通卡（购买“特洛伊卡”交通卡的押金为 80 卢布）。您可以在专门的售票点/充值机、地铁、单轨列车、МЦК 或 МЦД 售票处购买交通卡。
使用“特洛伊卡”交通卡时，“中心区”的单程票价为 50 卢布，使用“特洛伊卡”交通卡时为 56 卢布。运营商每年会对价格进行一次调整。使用“特洛伊卡”交通卡付费时，可享受“90 分钟”的优惠。它允许您乘坐一次地铁、单轨列车、МЦК 或 МЦД，以及不限次数地乘坐地面交通工具。

地铁
莫斯科地铁与莫斯科所有公共交通一样，运营时间为早上 5:30 至凌晨 1:00。开往不同车站的首班车和末班车到达时间不同（大约在地铁开始运营后 3-20 分钟）。凌晨 1:00 时，所有车站都停止进站，所有通往其他线路的中转站也关闭。早晚高峰时段列车间隔最短为 90 秒，平均为 2.5 - 3 分钟。地铁线路有特定的颜色和编号。每个车站都有俄语播报。有趣的是，当地铁向市中心或环线顺时针方向行驶时，由男声播报下一站；当地铁远离市中心或环线逆时针方向行驶时，由女声播报下一站。

公共交通（公共汽车、无轨电车、有轨电车）
莫斯科已建立了约 11 000 个现代化的站点（站台），安排乘坐地面公共交通的乘客上下车。其中许多站点都配备了为移动设备充电的 USB 端口，以及提供该路线上车辆到达时间信息的电子板。车站还提供该站停靠的公共汽车、无轨电车或有轨电车的线路编号信息。莫斯科有 16 条夜间地面交通路线。其运行间隔为 15 至 30 分钟。夜间线路的编号以字母“H”开头。此外，还有 24 小时线路“Б”（间隔时间是每 15 分钟一班）和 24 小时线路“m40”（间隔时间是每 30 分钟一班）。有关莫斯科城市交通路线的详细信息，请访问网站 mosgorzrans.ru
为方便使用莫斯科公共交通，我们建议您在智能手机上安装莫斯科交通应用程序（iOS 和 Android 设备均可使用）。该应用程序将为您推荐最便宜、最快捷的路线，并计算出大致的行程时间、路线上的换乘情况以及行程费用。在该应用程序中，您可以实时追踪所有路线的交通位置。

货币与安全

货币
俄罗斯的官方货币是卢布。由于很少有 24 小时营业的兑换处，建议尽可能提前在银行或其分支机构兑换货币。最新汇率以及买入/卖出汇率最优惠的地方，请访问 www.banki.ru。

安全
莫斯科是一座安全的城市，警察工作出色，街头犯罪率很低。在任何紧急情况下，请拨打 112。他们一定会伸出援手！
